

Berkley Vale Private Hospital

Hospital Description

Located within the Wyong Shire, Berkeley Vale Private Hospital is the newest private hospital on the Central Coast, being opened in August 1990. A member of Ramsay Health Care Limited since July 2001, the hospital is located approximately one hours drive north from Sydney and south from Newcastle, and is within thirty (30) minutes of both major public hospitals on the Central Coast – Gosford and Wyong Public.

A seventy five (75) bed hospital, it was the first private hospital on the Central Coast to establish a comprehensive rehabilitation program, approved by all the health funds, insurance companies, Workcover and the Department of Veteran Affairs.

Although traditionally an older population, a shift continues to occur to a younger patient case mix. The Wyong shire continues to accommodate the largest cohort of Department of Veteran Affairs' patients in NSW.

Program commencement dates

Because of our size, we have capacity to take on only two new graduates per year. We are happy to accommodate either full time or part time staff, depending upon what meets your needs.

What kind of rotations do we offer?

As we have 2 wards with more than one specialty we provide a medical/rehabilitation, surgical, and a theatre/anaesthetic/recovery rotation.

Brief descriptions of each area you rotate through.
